

November 26 - 27, 2019, Chemnitz

Clean drives. Efficiently produced.

Call for Papers

Users, suppliers and scientists who would like to contribute with a presentation, can submit a contribution.

The top topics for the scientific submissions are:

1. **Fuel-cell components and stack**
e.g.: bipolar plates, gaskets, GDL, MEA, BoP, tensioning system, stack conditioning, materials, manufacturing processes, simulation
2. **Fuel-cell system**
e.g.: H₂ tank system, compressors, valves, sensors, heat exchangers, operating strategies, thermal management, system simulation
3. **Flexible production and digitalization**
e.g.: powertrains, production processes and systems, production and factory planning, new stacking processes, Industry 4.0

You can send your abstract with a maximum of 1500 characters as a Word or pdf file in German or English to gert.schlegel@hzwo.eu.

Please include:

Title of the article,
Name of the author and all co-authors,
Name of the university, institution or company,
Telephone and fax number,
Post address,
E-mail address.

The abstracts are evaluated by the program committee. The authors of the selected abstracts are then invited to deliver the complete article in German or English. All accepted contributions will be published in electronic format with ISBN number for the conference on 26.11.2019. Language of the conference is German.

Important dates

April 15, 2019

Deadline for abstract submission

June 01, 2019

Confirmation of acceptance

October 06, 2019

Deadline for submission of the papers
